STOCK #	DESCRIPTION	R.R.P AUD \$
<p>One certain thing about the Sixties is that they were never boring. And that goes for guitars too! It was a time of innovation and individuality. Ideas and designs were flowing freely. Sometimes they worked and sometimes they didn't, but one thing is for sure, they looked cool!</p> <p>Whilst the new Italia range of guitars is clearly inspired by the style of the Sixties, they have the added advantage of being manufactured with the technical know-how of the 21st Century. This makes the Italia series play and sound great whilst being the coolest looking guitars available.</p>
